

Scheduler Ablation (A3: average timeout allocation), verified real runs at 20-40 ms

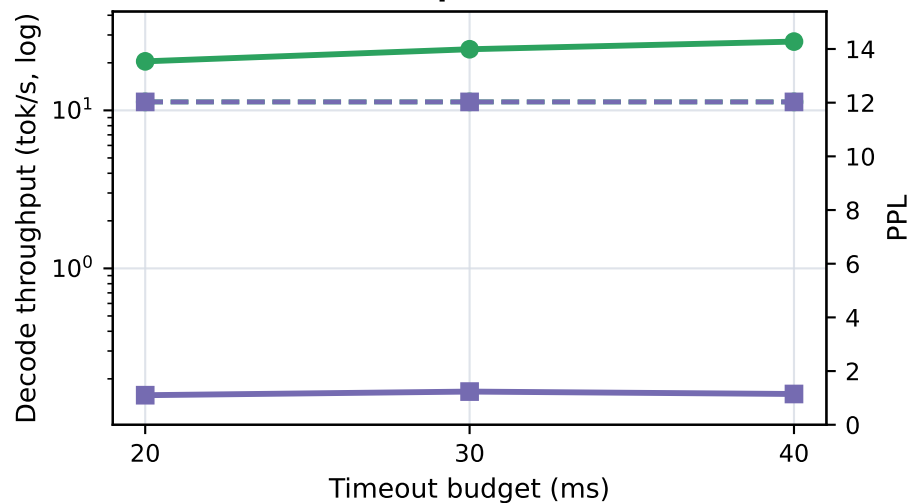

2 occupied cores

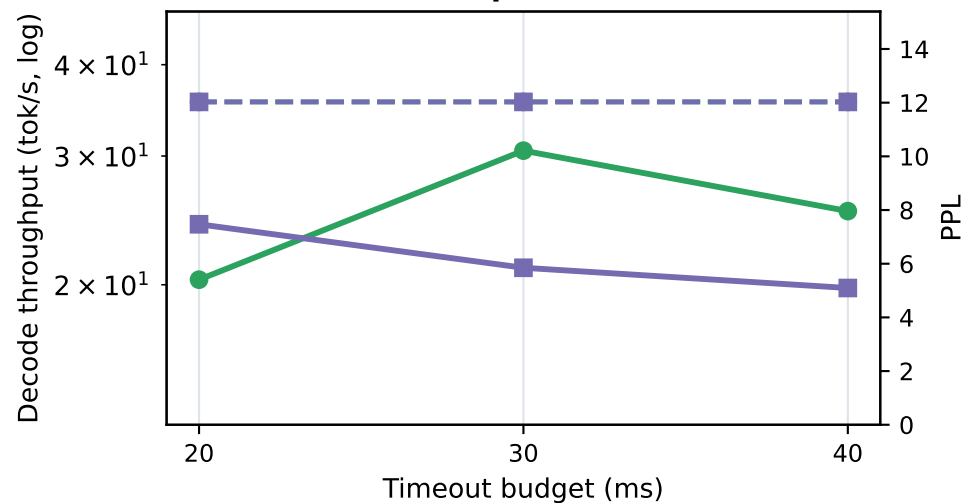

4 occupied cores

6 occupied cores

8 occupied cores

Legend:
● Scheduler throughput (left axis)
● Scheduler PPL (right axis)
— Average timeout throughput (left axis)
— Average timeout PPL (right axis)
Solid lines use the left y-axis for throughput; dashed lines use the right y-axis for PPL. Source rows: status=ok only.
