

# Scheduler Ablation (A4: no scheduler), verified real runs at 20-40 ms

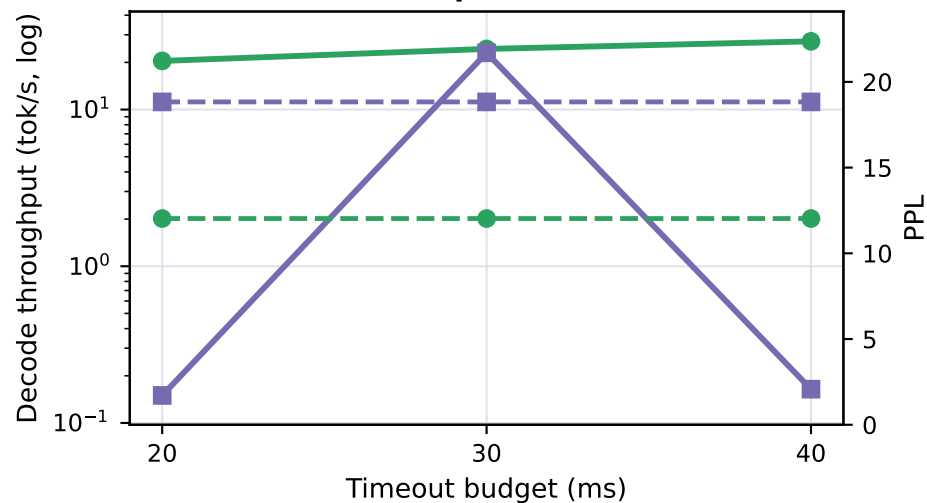

## 2 occupied cores

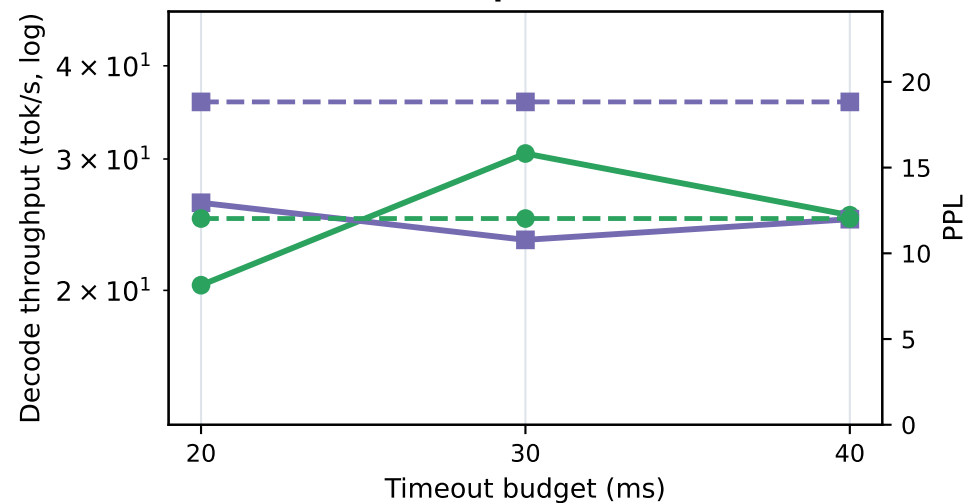

## 4 occupied cores

## 6 occupied cores

## 8 occupied cores

● Scheduler throughput (left axis)    ● Scheduler PPL (right axis)  
■ No scheduler throughput (left axis)    ■ No scheduler PPL (right axis)

Solid lines use the left y-axis for throughput; dashed lines use the right y-axis for PPL. Source rows: status=ok only.
